CAREER OBJECTIVE

Aspiring Computer Science Engineering graduate specializing in Cyber Security, with strong skills in Python, Django, SQL, and web technologies. Possess hands-on experience in HTML, CSS, JavaScript, React js along with a solid foundation in programming and database management. Committed to continuous learning and adaptability, aiming to contribute secure, reliable solutions to a progressive organization while growing as an Software professional.

EDUCATION

B.Tech in CSE - Cyber Security

2021 - 2025

CMR Engineering college, Kandlakoya

CGPA: 7.9 /10

TECHNICAL SKILLS

- **Programming Languages:** Python
- **Web Development:** HTML, CSS, Javascript, Reactjs
- **Web tools:** Git, GitHub, VS code, Vercel
- **Database:** SQL, Dbms
- **Common skills:** MS word, Excel, Power Point

PROJECTS

RESTAURENT FOOD ORDERING SYSTEM USING REACTJS:-

Live Demo:- <https://react-js-pro-liart.vercel.app/>

GitHub:- <https://github.com/K-Apoorva-reddy/ReactJS-pro.git>

- Developed a React-based restaurant web application to display menu items & manage food ordering through an interactive UI.
- Implemented dynamic menu & cart functionality, enabling users to add and remove items in real time using React state management.
- Designed an Orders section with quantity tracking and a responsive layout to enhance overall user experience.
- Built reusable components and client-side routing using React Router for smooth navigation across pages.
- **Technologies Used:** React.js, JavaScript, HTML, CSS, Vite, Geolocation API, Google Maps, LocalStorage, Git, GitHub, Vercel

DETECTING HIDDEN COLLABORATION IN ONLINE MCQ'S :-

- Developed a web-based ML-driven system to detect cheating and hidden collaboration in online MCQ exams using answer pattern and timing analysis.
- Developed real-time behavior analysis by monitoring answer similarity, submission timing, and response patterns to detect coordinated exam attempts.
- Integrated interactive visual dashboards and reports for tutors to monitor exam integrity, review flagged attempts, and make data-driven decisions.
- Enhanced security and reliability with role-based access, secure authentication, and a scalable client-server architecture for uninterrupted online exams.
- **Technical Skills & Tools:** Python, Django, MySQL, HTML, CSS, JavaScript, Machine Learning, Statistical Analysis, Data Visualization, Behavioral Pattern Analysis, Online Exam Systems, Fraud Detection, Client-Server Architecture.

CERTIFICATES

- Course era - Google Introduction to Cyber Security.
- Infosys - Spring Board(Data Structures And Algorithms).

SOFT SKILLS

- Team Leading.
- Time Management.
- Problem solving.
- Team Collaboration.
